Global leader in digital transformation of energy management and automation

Schneider Electric Solar Business

As an industry leader, Schneider Electric Solar Business focuses on designing and developing products and solutions for the solar power conversion chain and providing best-in-class global customer service and technical support. Our technology is powering photovoltaic systems all over the globe.

As the solar market goes through a rapid wave of consolidations, Schneider Electric Solar Business is one of the very few companies that can assure that spare parts, service and technical support will be continually available over the 20+ year life of a solar installation. A solid partner, financially and technically. We are your long-term partner for solar.

Schneider Electric Solar Business - Offer Services

We are committed to maintaining the value of your solar investment. Protect your solar investment and maintain your system's profitability with a service contract from Schneider Electric Solar Business.

Wherever your system is installed, there is a Schneider Electric Solar Business support team trained in your system's technology, and your local power requirements and regulations. We maintain parts depots in every major region. Schneider Electric Solar Business Service currently supports over 4,500 commercial clients and over 300,000 solar power installations around the world.

15+ years

of experience in Solar

#1 solar

Inverter Supplier in the O&M space

110 countries

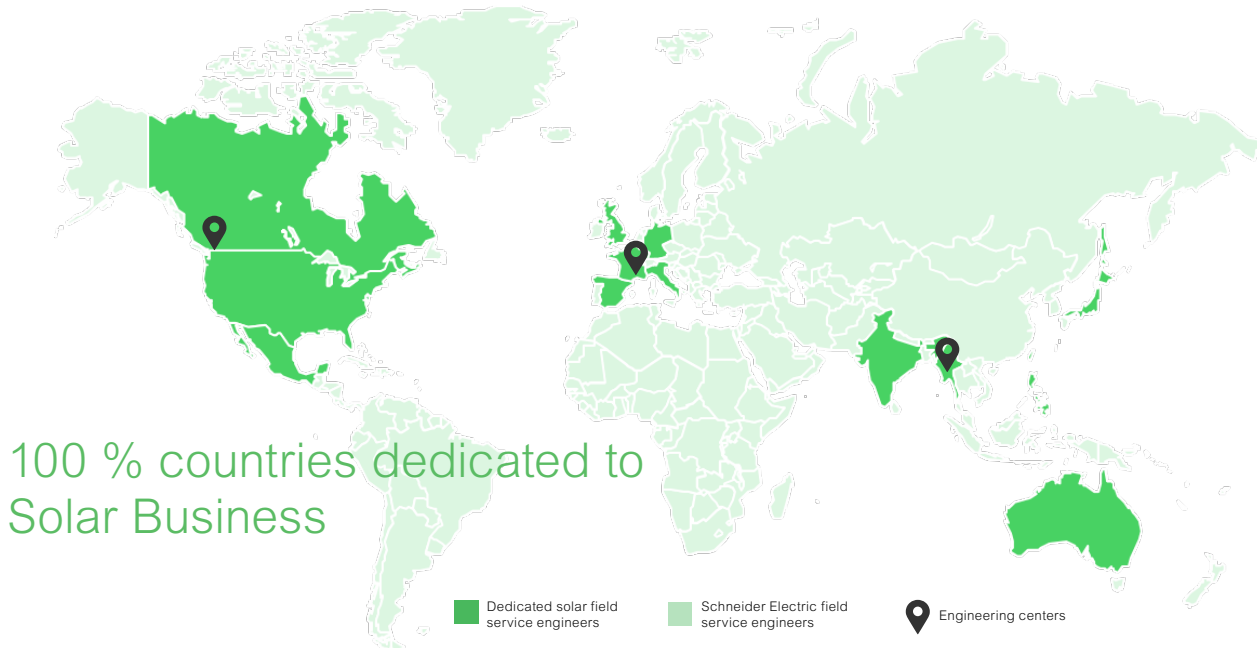

150 workforce fully dedicated to Solar in the main countries. 200+ Specialized software engineers in 3 continents.

10+ GW

connected to the grid with Schneider Electric utility-scale inverters since 2000

2.8+ GW

monitored

Conext™ Viewer - Connected Inverters

The most advanced inverter interface yet, Conext™ Viewer provides local Wi-Fi and Ethernet connectivity as well as remote data access to inverter operational data.

It also provides advanced troubleshooting, lifetime service logging, remote firmware upgrades, online service documentation and help files - all the power and capabilities of the digital world supporting your Conext SmartGen™ inverter.

A better approach

- One viewer for all users
- Friendly user interface on Windows
- Local and Remote diagnostics
- Local Inverter connection through Wi-Fi or Ethernet connectivity
- Remote Connection through Schneider Electric Cloud Infrastructure

View details on faults, alerts, and warnings with contextualized help and advanced diagnostics

View and change operating parameters

Reduced learning curve to increase user satisfaction and minimize risks

Check the SmartGen Power System status to quickly detect issues to minimize downtime

Commission and Service the SmartGen Power System

Access to configuration parameters to service and maintain the SmartGen

Local or remote diagnosis to support advanced troubleshooting

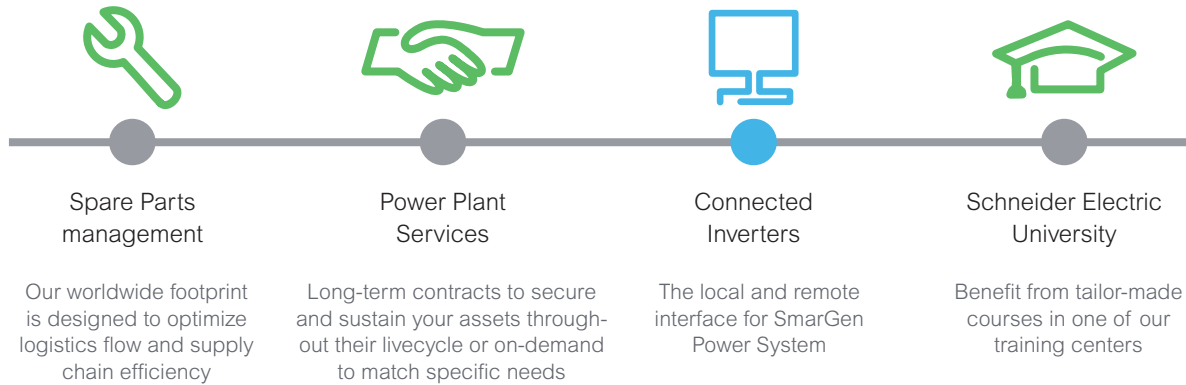

Cloud Connected

Cloud-based remote data collection for the Conext SmartGen, where data from globally-deployed systems is analyzed for predictive maintenance, and to provide enhanced remote service and technical support.

Why partner with Schneider Electric?

Why you should use Conext™ Viewer?

Monitor and configure Conext SmartGen Power System remotely

Give advanced features for troubleshooting

Predict preventive maintenance thanks to cloud-based data analytics

Reduce downtime
